

GI Bleed

Choose words carefully to capture the true severity of illness (SOI) for your patient:

No SOI	Moderate SOI	High SOI
Stool with + occult blood	GI Bleeding Melena	GI Bleeding from <u>DEFINED</u> site (e.g. PUD)
GERD Esophagitis	Acute esophagitis Esophageal ulcer	Esophageal ulcer with bleeding or Mallory-Weiss

Don't forget to document the associated **acute blood loss anemia** as a separate problem ***in addition to*** the GI bleed that caused it.
