

FY 2024 COMMON CARDIAC MCCs AND CCs

OCTOBER 2023

Each year CMS updates the list of diagnoses classified as Major Complications and Comorbidities (MCCs) and Complications and Comorbidities (CCs). These annual changes go into effect October 1, the beginning of the Medicare Part A (Inpatient care) fiscal year.

- Complications describe conditions that arise during an inpatient admission (POA = N)
- Comorbidities denote conditions that existed prior to admission (POA = Y)

The chart outlines common cardiac MCCs and CCs for FY 2024.

Key MCCs	Key CCs
Acute Heart Failure <ul style="list-style-type: none"> • Systolic (HFrEF) • Diastolic (HFpEF) • Combined 	Acute Coronary Insufficiency
	Acute Coronary Microvascular Dysfunction
Acute Myocardial Infarctions <ul style="list-style-type: none"> • STEMI • NSTEMI • MI Type 2 • MINOCA 	Acute Ischemic Heart Disease
	Angina Pectoris with documented spasm
	Atrial Fibrillation <ul style="list-style-type: none"> • Longstanding persistent • Other persistent • Chronic • Permanent
	Atrial Flutter
	Bifascicular Block
	Cardiomyopathy (except ischemic)
	Chronic Heart Failure <ul style="list-style-type: none"> • Systolic or reduced • Diastolic, preserved or recovered • Combined or left
	Complete Heart Block
	Hypertensive Crisis or Emergency
	Refractory Angina Pectoris
	Supraventricular Tachycardia (specify type)
	Trifascicular Block
	Unstable Angina
	Ventricular Tachycardia
